Hull Clinical Commissioning Group

What is See & Solve

- Provision of quality information and advice and solution focused early help and interventions
- Reduce and delay the need for formal care and support
- Solutions that are linked and connected to the community that promote independence, prevention and individual aspirations

National Drivers

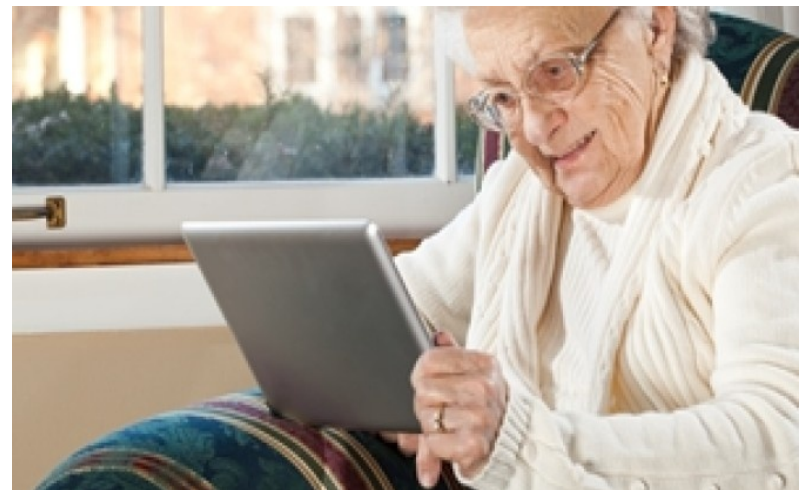

- Care Act 2014
- Think Local! Act Personal. (TLAP)
- Better Care Fund

Local Drivers

- Adult Social Care Review
- Integration
- Ageing Population – Living well
- **Local vision “A life not a service”**

The current way of working:

- Is based on an intake model
- People are offered a service and the expectation is that their needs are met by formal care
- The evidence suggests that people stay in formal services instead of alternatives

Principles of New Model

- Working with the community i.e. hubs model
- Partnership/integrated working with other agencies
- Resources diverted to respond to the needs of people earlier
- Encourage independence and resilience
- Support people to remain in their own home
- Increase choice and control
- Find better value solutions – optimal use of assets in the community
- Changing the conversation
