

## **QUALITY & PERFORMANCE REPORT**

# NHS HULL CCG BOARD

## **MARCH 2018**

## TABLE OF CONTENTS

Executive Summary	3
Financial Position	4
Quality Premium	6
CCG Performance Indicator Exceptions	7

### **Financial Summary**

A number of variances are now clearly identified both under and overspends across different areas of the budget. Through the utilisation and careful management of identified contingency, all financial performance targets for 2017/18 are forecast to be achieved.

#### Performance and Contracting

A&E 4-hour waiting times continue to deteriorate as the Emergency Department is challenged over the winter period. January was stretched further than previously due to significant incidence of flu and challenges continued into February. The CCG continues to work with the provider on a daily basis to manage the issues that present. The nominated CCG lead for emergency pressures communicates operational issues affecting patient flow, coordinates wider system responses and works with external stakeholders to support improvement where possible.

RTT waiting times performance continues to underperform. Joint working by commissioners, providers and primary care on demand management continues to focus on implementing effective referral management procedures, alternative pathways and cost reduction which will ultimately result in decreases in elective referrals and overall waiting size. Alongside this there is significant work ongoing to improve the productivity of elective treatment. Referral numbers are now reducing but are yet to translate into improved waiting times performance.

Cancer waiting times are variable with several indicators falling below their targets in January, increased focus is being directed towards the management of cancer pathways.

Performance against the 6-week waiting times target for diagnostic tests has deteriorated and remains an area of concern with endoscopy being an area of significant pressure in addition to CT imaging. Recovery for CT imaging is being mitigated through outsourcing.

Psycological therapy (IAPT) services are underperforming on access and waiting times targets and the recovery rate is variable between marginally above and marginally below the target.

### Quality

#### HEYHT

The provider has set up a 'Patient Harm Group' to support patient tracking. All records have been validated by an administrator and are now being clinically validated.

HEY were re inspected by the CQC during February 2018 for their Core Services and 'Well Led' domain, the outcome of the inspections is awaited.

#### Humber

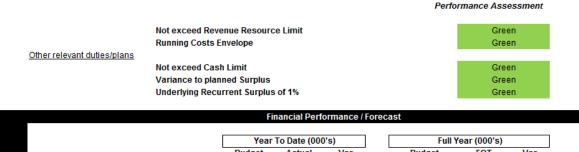

Humber NHS FT has received their final report with a 'Good' rating overall ; they do however remain assessed as 'Requires Improvement' for the 'Safety' domain.

Staffing remains a challenge for all providers work is ongoing to address the recruitment issues.

### **Financial Position**

#### Achievement of Financial Duties / Plans

Based on information available up to the 28th February 2018. Achievement against the financial performance targets for 2017/18 are as follows

	Year To Date (000's)			Full Ye			
	Budget	Actual	Var	Budget	FOT	Var	Risk
17/18 Core Allocation	(407,482)	(407,482)	-	(453,746)	(453,746)	-	
Use of prior years surplus	-	-	-	-	-	-	
Acute Services	187,834	189,260	(1,426)	204,910	206,910	(2,000)	Red

Community Services	48,086	48,529	(443)	52,503	52,953	(450)	Green
Mental Health & LD	40,611	41,102	(491)	44,303	45,153	(850)	Amber
Continuing Care	21,608	20,143	1,465	23,572	21,822	1,750	Amber
Other Including Earmarked Reserves	5,432	5,738	(305)	12,398	12,588	(190)	Green
Running Costs	5,253	5,018	235	5,732	5,663	69	Green
TOTAL EXPENDITURE	396,788	396,788	-	439,373	439,373	0	
Under/(over)-spend against in year allocation		-	-	-	-	0	Green
Balance of prior year surplus	(10,694)	(10,694)	-	(14,373)	(14,373)	0	Green

KEY:

RED = Variance of £2M or above AMBER = Variance between £500k - £2M GREEN = Variance less and £500k Exception: Other including contingency

#### Summary Financial Position as at 28th February 2018.

The CCG is currently forecasting to achieve a balanced position against the in-year allocation. There is therefore no impact on the CCG's historic surplus of £11.666m. This is in line with the 2017/18 financial plan submitted to NHS England. It should be noted that in addition to this NHS England are expected to instruct the CCG to release the uncommitted risk reserves and potentially elements relating to Category M prescribing savings (currently being held by the Business Services Authority) in March and thereby increase the reported surplus.

This year's running cost allocation is £6.223m and the current forecast is that expenditure will be contained within this financial envelope.

Spire Healthcare: At the start of the year there were a greater than planned number of referrals into Spire Healthcare resulting in a forecast overspend of £2m. The MSK triage pathway has resulted in a significant reduction in the number of referrals for orthopaedics towards the end of the year and this is expected to have an impact on activity in the next financial year.

Continuing Healthcare: The CCG's expenditure in the last financial year was significantly under budget due to a decline in the number of patients being eligible for CHC. The budget for this year was reduced to reflect this. The forecast underspend of £1.75m this year reflects the full year effect of the reduction in 2016/17.

Community Based (forecast £0.45m overspend): The most significant area of overspend relates to individual / bespoke packages of care. The commissioning team are working with specialised commissioners and major trauma

network to identify an improved model to care for these patients (i.e. case managers / accreditation of providers). This is expected to increase the speed of recovery and reduce the length of stay.

Prescribing (forecast underspend £1.2m): This is based on the central reports received for month 9 expenditure and assumes that approximately £0.5m of price reduction from Category M adjustments will be retained by NHS England. Across the country there have been a large volume of price concessions approved by the Business Services Authority (BSA) e.g. due to a shortage of drugs; meaning that some payments have been higher than the specified drugs tariff. It is forecast that this will cost the CCG approximately £2m and this is included in the forecast position, however it is very difficult to predict these additional costs from one month to the next meaning that the position could be volatile.

Primary Care Delegated Commissioning (forecast underspend £671k): Based on information provided by NHS England compared to the budget received as part of the primary care delegation process. This reflects the level of contingency that has not yet been committed. Note that an element of this relates to the risk reserve associated with the new primary care budgets.

Mental Health (forecast overspend £850k): Expenditure on the mental health issues for looked after children is forecast to be approximately half the value in 2016/17 as there are currently fewer children being funded through this budget. This area has traditionally been very volatile due to the small number of high cost patients. Out of area mental health costs also share this trait and the overspend has increased significantly in recent months. This is due to a lack of local capacity to meet the demand. A plan for investment in the local provision for adult acute mental health pathways is currently progressing through the relevant governance structure.

Potential Risks: The CCG is party to two significant risk sharing arrangements. The first is with Hull City Council and relates to the Better Care Fund and the council are reporting an associated overspend on adult social care. The second arrangement is the Aligned Incentive Contract with Hull & East Yorkshire Hospitals NHS Trust and East Riding of Yorkshire CCG.

#### **Statement of Financial Position**

At the end of January the CCG was showing £23.7m excess of liabilities over assets. This is expected for an NHS commissioning organisation and is in line with the previous financial year.

#### **Revenue Resource Limit**

The annual Revenue Resource Limit for the CCG was £451,039k for both 'Programme' and 'Running' costs. This has increased by £2k in January.

#### **Working Balance Management**

#### Cash

The closing cash for February was £3,046k which was above the 1.25% target of £400k. The reason for this non-achievement relates to a delay in the receipt of invoices.

#### Better Payment Practice Code: Target 95% payment within 30 days

#### a. Non NHS

The Non NHS performance for February was 99.41% on the value and 98.49% on the number of invoices, whilst the full year position is 98.46% achievement on the value and 96.26% on number.

#### b. NHS

The NHS performance for February was 100.00% on the value and 100.00% on the number of invoices, whilst the full year position is 99.91% achievement on the value and 97.67% on number.

### **Quality Premium**

The quality premium paid to CCGs in 2018/19 - to reflect the quality of the health services commissioned by them in 2017/18 - will be based on measures that cover a combination of national and local priorities.

#### Gateways:

**Finance** - means delivery of financial plans and NHS England business rules. Failure in this area means that regardless of performance in any other area the CCG will not be awarded any of the Quality Premium funding. **Quality** - NHS England reserves the right not to make any quality premium payments to a CCG in cases of serious quality failure.

**Constitution** - some providers will continue to have agreed bespoke trajectories, as part of the operation of the Sustainability and Transformation Fund, for delivery of four hour A&E waiting times, 62 day cancer waits and 18 week RTT.

During January there were 13 x 52 week breaches for the CCG with 6 at HEYHT and 7 at CHCP:

HEYHT: 2 x Gastroenterology, 1 x Trauma & Orthopaedics and 3 x Urology, 4 of the patients have now been discharged.

CHCP: 7 breaches allocated to the tier 3 Weight Management Service which is a positive reduction on previous months and is expected to cease going forward.

Cancer 62 day waits: Urgent GP referral for suspected cancer (includes 31 day rare cancer) – 52 patients, 44 within 62 days with 8 breaches (44/52=84.62%).

7 of the breaches were due to lack of capacity and complexities with the remaining breach due to patient choice.

Cancer 62 days of referral from an NHS Cancer Screening Service – there were 5 patients seen, 4 within 62 days and 1 breach (4/5=80%).

The breach was due to a complex pathway.

During January the Hull CCG patients had 4318 diagnostics undertaken of which 3,919 were within the 6-wek waiting time standards and 399 were breaches that waited longer than 6 weeks.

The majority of waits beyond 6 weeks were for endoscopies 45% (181/399) and Imaging 41% (163/399).

The trust is actively working towards reducing waiting times for diagnostics and reporting into the planned care delivery group monthly.
