

## Item 9.1

### **PLANNING & COMMISSIONING COMMITTEE MEETING HELD ON 6 JULY 2018 CHAIR'S UPDATE REPORT**

#### **INTRODUCTION**

This is the Chair's report to the Clinical Commissioning Group Board following the July 2018 Planning and Commissioning Committee.

#### **6.11 SPECIFICATIONS FOR SEXUAL AND REPRODUCTIVE HEALTH**

It was noted the Hull City Council Cabinet had given approval to procure Sexual and Reproductive Health service, made up of two lots and a further GP/ LARC provision which would be delivered through the GP groupings. These include a specialist SRH (Lot 1), adults and young people promotion service (Lot 2) and a GP LARC service, working across primary care providing Long Acting Reversible Contraception fittings and removals.

The model outlined for recommissioning was based on the delivery of a promotional service, a clinical service and LARC service. This would be through a single contract for sexual health promotion targeting health inequalities across the life course, and e also to procure clinical provision which would include a specialist clinic, GP provision, Pharmacy provision, and out of area cross charging activity.

The model aims to supports the strategic principles of Hull City Council and Hull CCG services continue to build on previous success of the SRH system model in identifying and responding to existing and emerging trends in relation to sexual and reproductive health.

A full equality impact assessment had been undertaken; which found that the service impacts on a number of protected characteristics. Some of the findings included that fewer men than women access the service, those aged between 15 and 30 accessed the service most frequently, improved access by LGBT+ and that there were some gaps around reporting on disabilities. Identified risks on protected characteristics would be managed in line with the Authorities' policy.

It was requested that "a review should be undertaken six week after insertion" paragraph be removed from the LARC along with LMC quality audits.

#### **6.5 RECOMMENDATIONS OF THE PRIORITISATION PANEL**

The Prioritisation Panel reviewed a total of five schemes across a number of work-stream areas. In total these applications came to £1,669.2k. These were a mixture of recurrent and non-recurrent funding requests.

Of the five cases put forward all have been recommended for approval, however in some cases the amount approved was less than initially requested. In addition the

Panel suggested a number of requirements / control measures that should be incorporated with the investment.

CYP Autism Scheme had been approved although the panel did not accept the level of on-costs included in the proposal therefore the amount approved had been reduced by £80k. The panel were happy that the resource was set aside recurrently in the financial plan however this element (£222k after on cost reduction) should only be released non-recurrently with an appropriate service specification for the intervention service being approved.
