**PRIMARY CARE COMMISSIONING COMMITTEE
MEETING HELD ON 25th OCTOBER 2019
CHAIR'S UPDATE REPORT**

Part One

INTRODUCTION

This is the Chair's report to the Clinical Commissioning Group Board following the October 2019 Primary Care Commissioning Committee.

GOVERNANCE

The Committee agreed in principle a proposed Primary Care Quality Assurance process, including a Primary Care Commissioning Policy on Monitoring and Evaluation. The process and policy ensures the CCG meets the statutory duty relating to the quality assurance of primary care medical service provision.
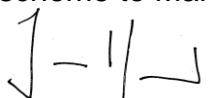

STRATEGY

The Committee approved a request from Sutton Manor Surgery to return from a PMS contract to a GMS contract with effect from 01/04/2020 and considered a 12 month list closure request from Kingston Health (Hull) and advised that further information was required before a decision could be made.

The Committee received updates in relation to Primary Care Network organisational and clinical director development resources, General Practice Forward View resources, the progression of the west Hull primary care facility as a 3rd party rather than LIFT development, the Targeted Lung Health Check programme. The Committee also received an update from the CCG Planning and Commissioning Committee in relation to the cessation of managed repeat prescriptions.

SYSTEM DEVELOPMENT & IMPLEMENTATION

The Committee received a report in relation to the future commissioning options for the Extended Primary Care Medical Services that the CCG commissions from general practices. The Committee approved the option to commission the services at Primary Care Network level from April 2020. The Committee also approved the commissioning on minor surgery services from Primary Care Networks from April 2020.

The Committee approved the continuation of the Primary Care Follow-up Assessment post Comprehensive Geriatric Assessment (CGA) at the Jean Bishop Integrated Care Centre scheme to March 2020.
